

CS 189

Introduction

Instructors:

Moritz Hardt

Benjamin Recht

Stella Yu

What is machine learning?

the study of *prediction* from *examples*

Estimate $y=f(x)$ from observations
 $(x_1, y_1), (x_2, y_2), \dots, (x_N, y_N)$

Hope that this also works on new examples.

What is machine learning?

the study of *prediction* from *examples*

user history → recommendation

email → spam detection

lab tests → cancer diagnosis

image → scene description

English sentence → Korean sentence

lidar → driving plan

Machine Learning is Unavoidable

Spam filters, ranking, image recognition, translation,
newsfeed ranking, knowledge organization

AI is one of the most important things humanity is working on. It is more profound than, I dunno, electricity or fire.

In the next five to 10 years, AI is going to deliver so many improvements in the quality of our lives.

Tag Your Friends

This will quickly label your photos and notify the friends you tag. [Learn more](#)

The Facebook post that mistranslated
'good morning' to 'hurt them'

How do we ensure that our models are **reliable** and **safe**?

Machine Learning is Dangerous

Machine Learning is Dangerous

Machine Learning is Dangerous

Machine Learning is Powerful

Machine Learning is Dangerous

With great power comes great
responsibility.

How do we engineer systems that can
learn from data, but are reliable and safe?

This class is not for you if...

Your primary goal learning how to import tensorflow so you can get a job at Amazon, Facebook, or Google.

You want to learn a bag of tricks to win Kaggle competitions or video games.

You not feel comfortable with concepts of linear algebra and probability at the level of EEI26 and EEI27.
